0580_w20_qp_23_Q12

12 A straight line, l, has equation $y = 5x + 12$.

(a) Write down the gradient of line l.

..... [1]

(b) Find the coordinates of the point where line l crosses the x-axis.

(..... , ...) [2]

(c) A line perpendicular to line l has gradient k.

Find the value of k.

$k =$ ..... [1]
