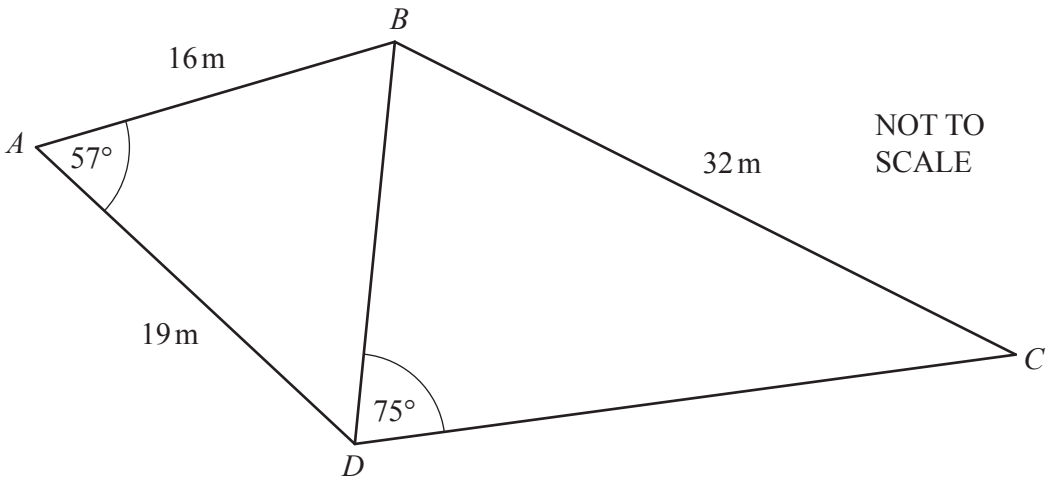
0580_s21_qp_42_Q6

6



The diagram shows a quadrilateral *ABCD* made from two triangles, *ABD* and *BCD*.

(a) Show that $BD = 16.9$ m, correct to 1 decimal place.

[3]

(b) Calculate angle *CBD*.

Angle *CBD* = ... [4]

(c) Find the area of the quadrilateral *ABCD*.

..... m^2 [3]

0580_s21_qp_42_Q6

(d) Find the shortest distance from B to AD.

..... m [3]
