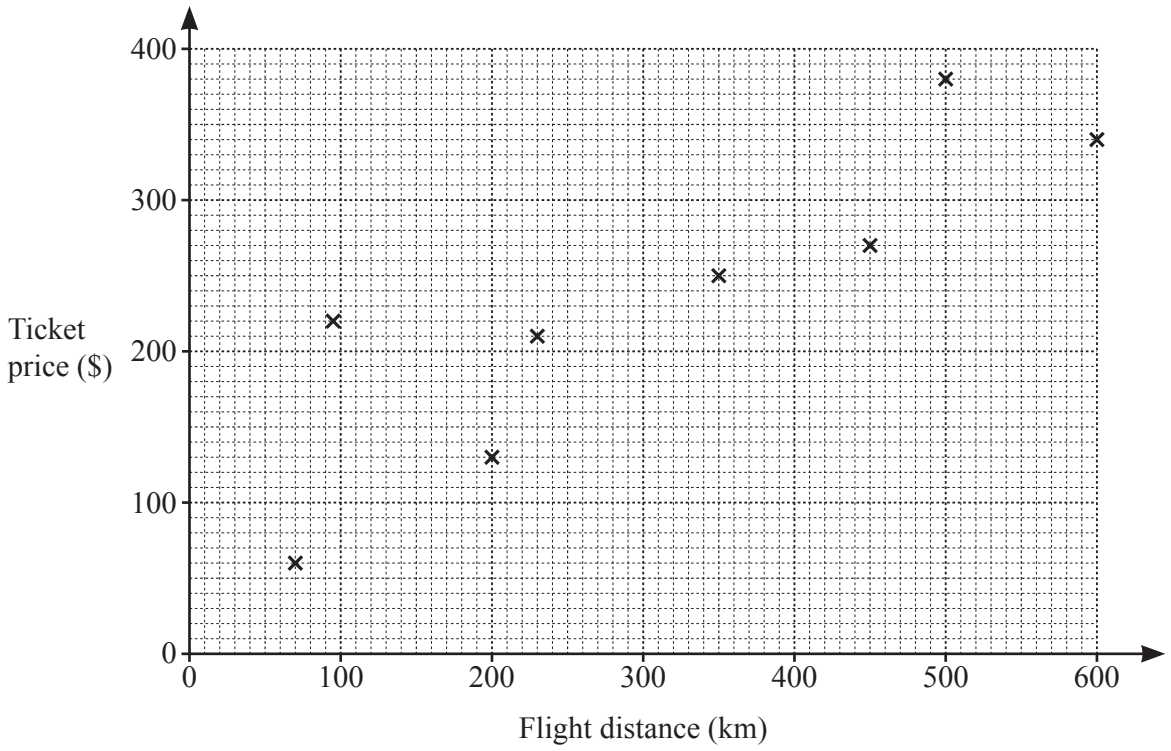
0580_s22_qp_32_Q5

5 Rebecca records the flight distance and the ticket price for each of her last 12 plane journeys.

Flight distance (km)	95	230	70	500	200	450	600	350	100	275	380	540
Ticket price ($)	220	210	60	380	130	270	340	250	120	170	310	305



(a) Complete the scatter diagram.
The first eight points have been plotted for you. [2]

(b) What type of correlation is shown in the scatter diagram?

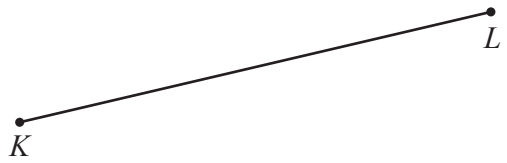
..... [1]

(c) On the scatter diagram, put a ring around the point for the journey that has the highest price per kilometre travelled. [1]

(d) On the scatter diagram, draw a line of best fit. [1]

0580_s22_qp_32_Q5

(e) The scale drawing shows two airports, *K* and *L*.
The scale is 1 centimetre represents 50 kilometres.



Scale: 1 cm to 50 km

A plane flies in a straight line from *K* to *L*.

Use the scale drawing and your line of best fit to find an estimate for the ticket price of the journey from *K* to *L*.
