0580_m24_qp_32_Q2

2 **(a)**

Fuel Garage *A* $1.41 per litre	Fuel Garage *B* $1.50 per litre

(i) Tiya buys 55 litres of fuel from garage *A*.

Work out the change she receives from $100.

$ ..... [2]

(ii) Work out how much cheaper it is to buy 20 litres of fuel from garage *A* than from garage *B*.

$ ..... [2]

(iii) These are the amounts that 6 people spend on fuel at garage *A*.

$63 $84.50 $72.23 $46 $54.10 $80

Calculate the mean **number of litres** that they buy.

..... litres [3]

(iv) The cost of fuel at garage *B* increases from $1.50 to $1.53 .

Calculate the percentage increase.

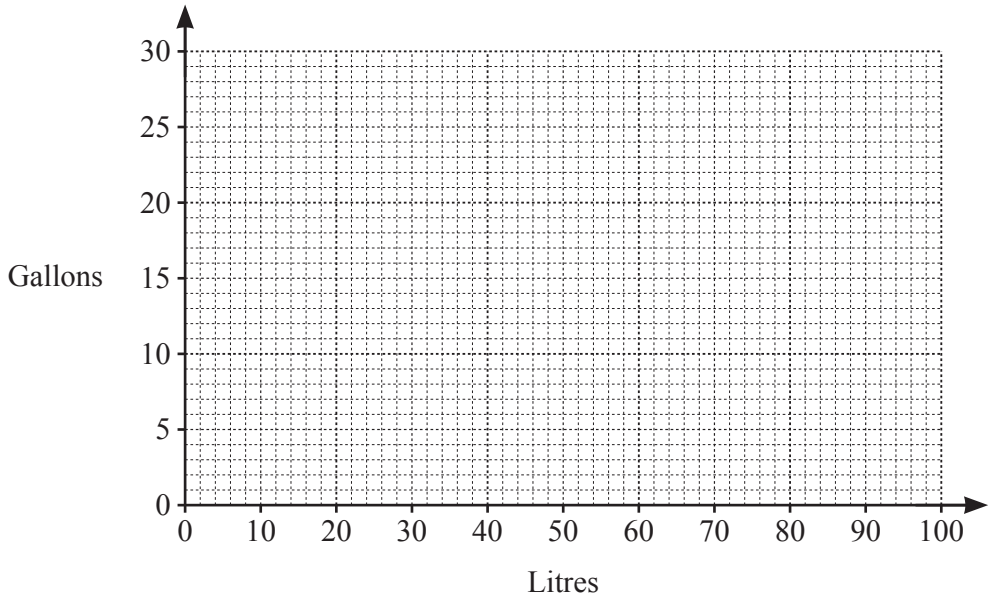
..... % [2]

(b) The fuel tank of a car is $\frac{2}{5}$ full.
It takes 39 more litres of fuel to fill the tank.

Work out the number of litres of fuel in a full tank.

..... litres [3]

(c) **(i)** Use 1 litre = 0.22 gallons to complete this conversion graph.



[2]

(ii) Use 1 litre = 0.22 gallons to complete this statement.

1 gallon = ... litres. [1]

(d) A cylindrical tank for storing fuel has radius 1.5 metres and height 8 metres.

Calculate the volume of the tank **in litres**.

..... litres [3]
